room was completed and that the full student body was seated at one time for their first meal in the college refectory.

Speaking with a smile of reminiscence, Dr. Sykes told of the consternation of those who were acquainted with the fact that on that first day of college they learned that electrical connection had not yet been made. But at 6 o'clock that night electric lights were turned on.

Reviewing the first day of the college life, Dr. Sykes recalled a scene that he felt sure would never be forgotten by any that witnessed it, that of the dining hall at that first memorable dinner on the evening of Sept. 27, 1915, when seated at tables lighted by the ancient candle, students held social intercourse, while watching from the eastern windows, that streat golden orb, the moon, rise out of its bed beyond the neighboring hills across the river. Such a scene gould be nothing less than an inspiration and a memory to be carried throughout a lifetime by those who were present on that memorable occasion.

Speaking briefly of the faculty that has been chosen from the 55 institutions of learning throughout the country, Dr. Sykes added, announcements regarding the additional appointments made for the coming year, that Miss Carola Ernst, in the department of romance language, who has already made many friends in this locality. Miss Lakildompher, who comes as assistant to Blias Hagel Woodhuli, instructor in gymnastics, from the first college of this country to open its doors to women, Oberlin college, Prof. Arthur Graves, who was the speaker of the evening, E.
